

TASK 4

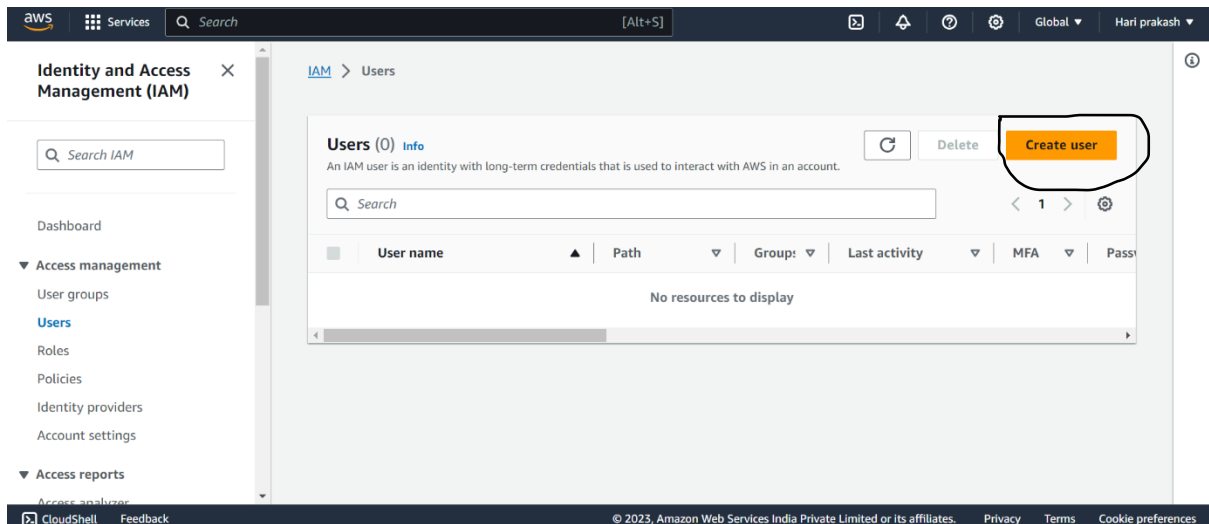

CREATE IAM USER WITH MFA VERIFICATION

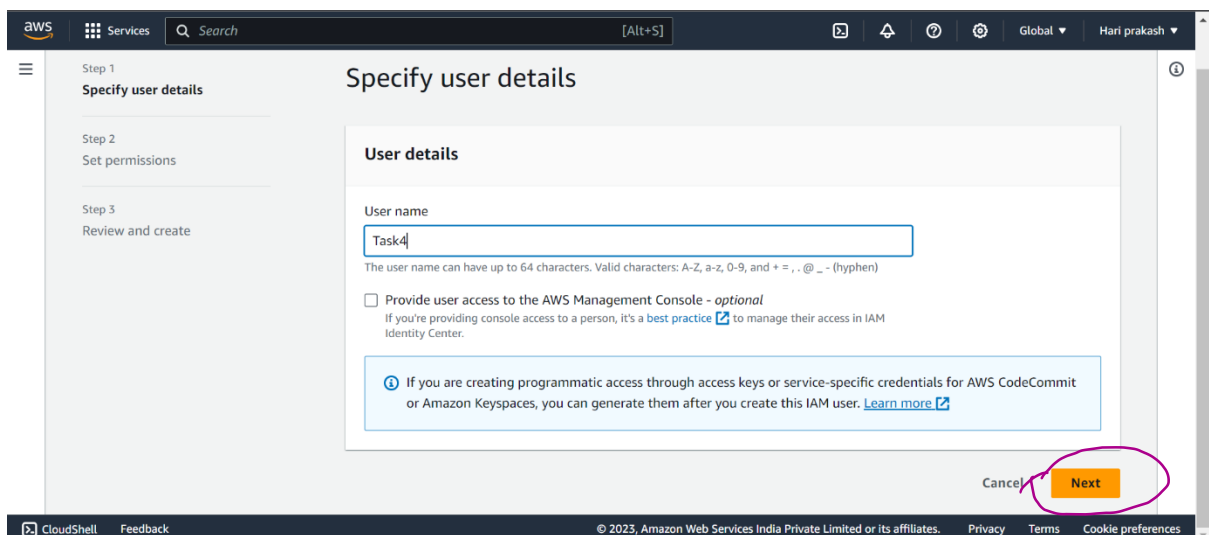

1. In the console home we search the IAM

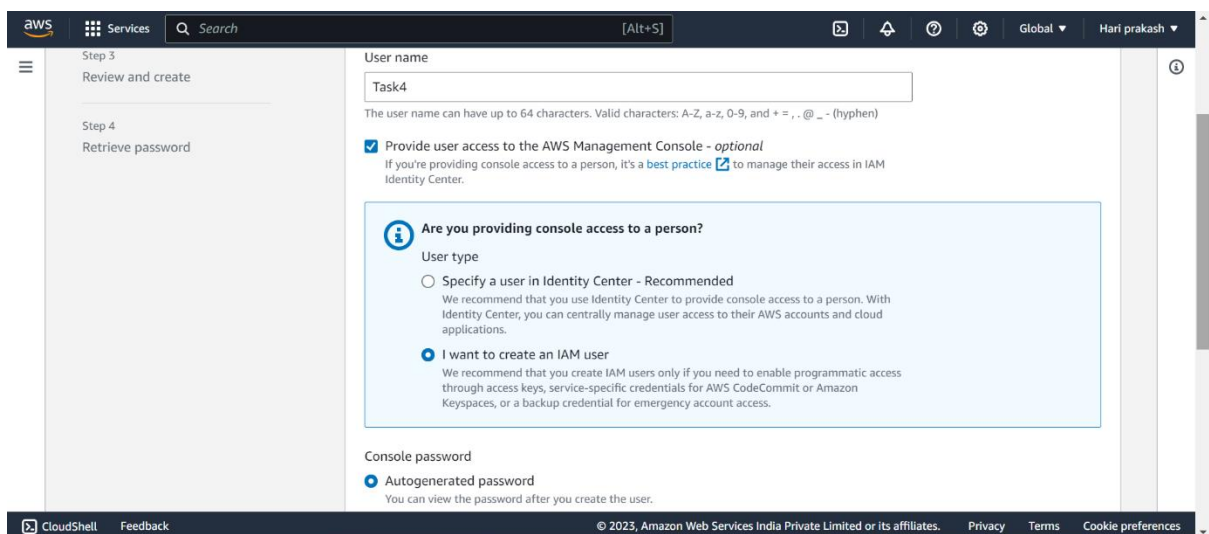

2. In the IAM we create the user

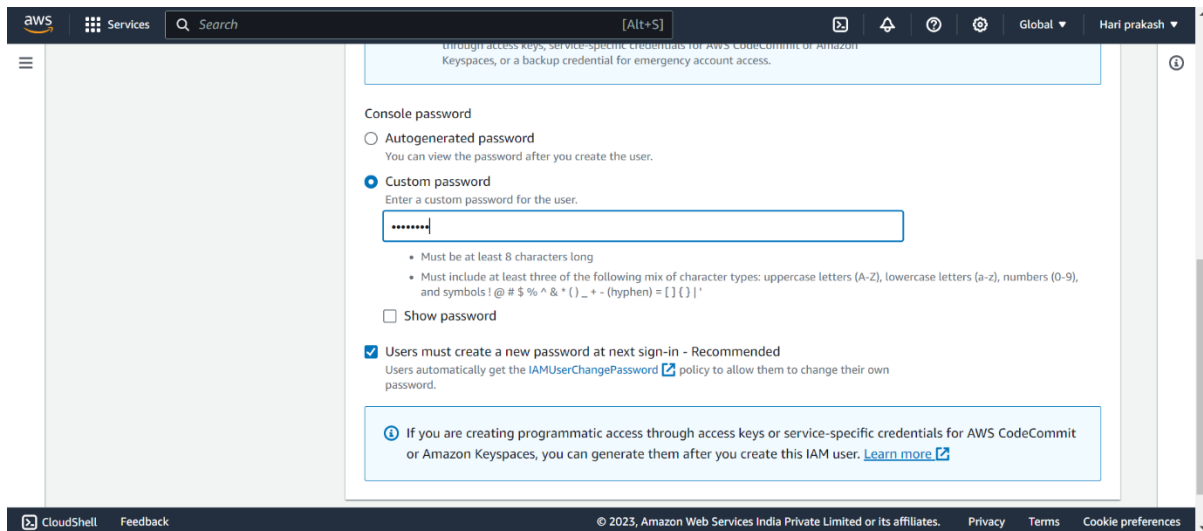

3.In the users we create the user

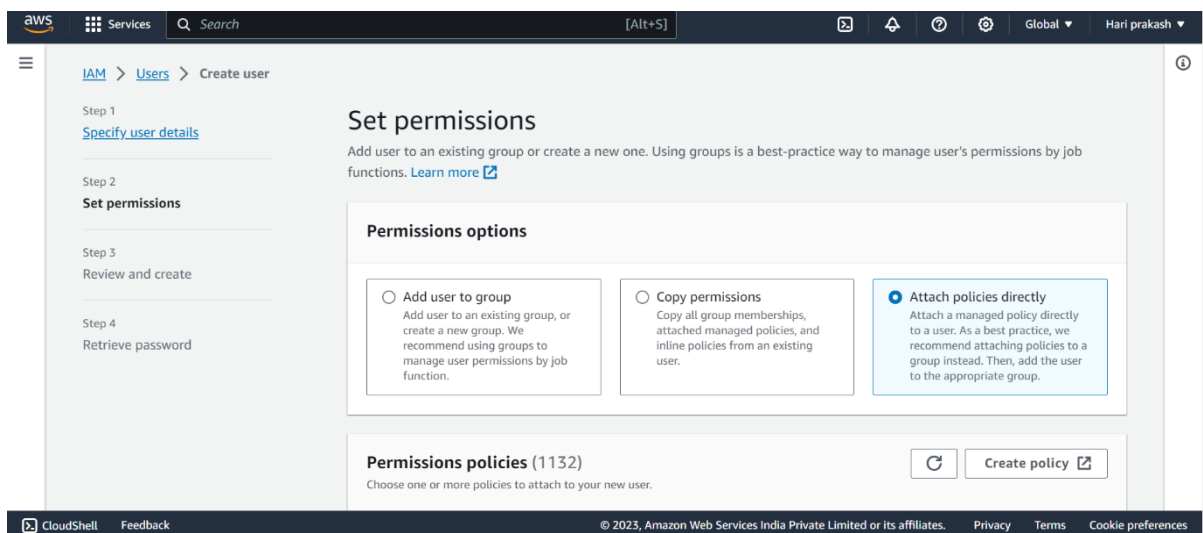

4.In the specify user details we enter the user name as Task4

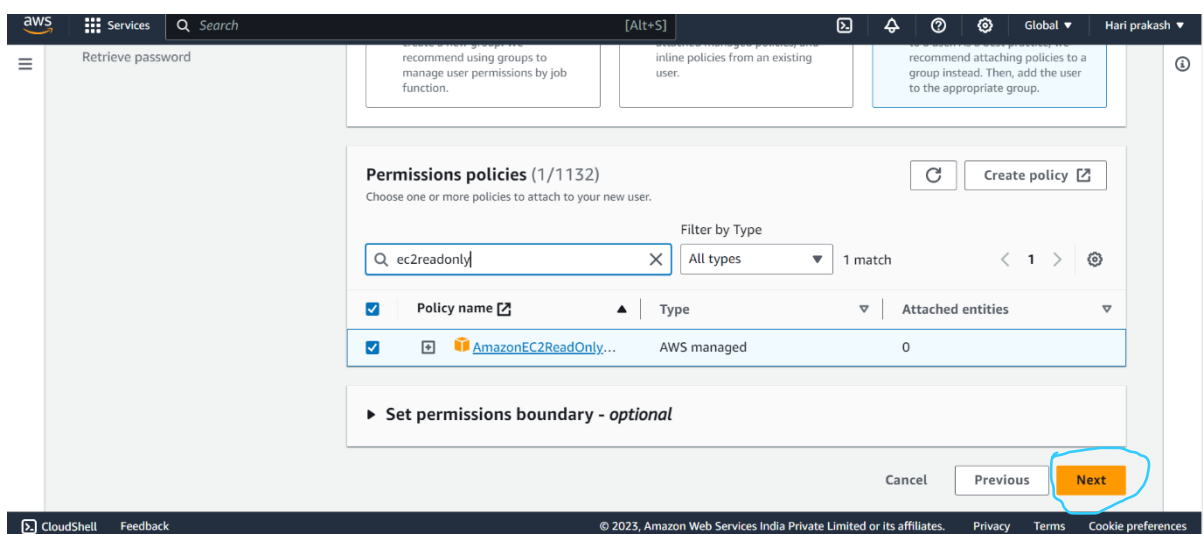

5.In this we select that I want to create an IAM user

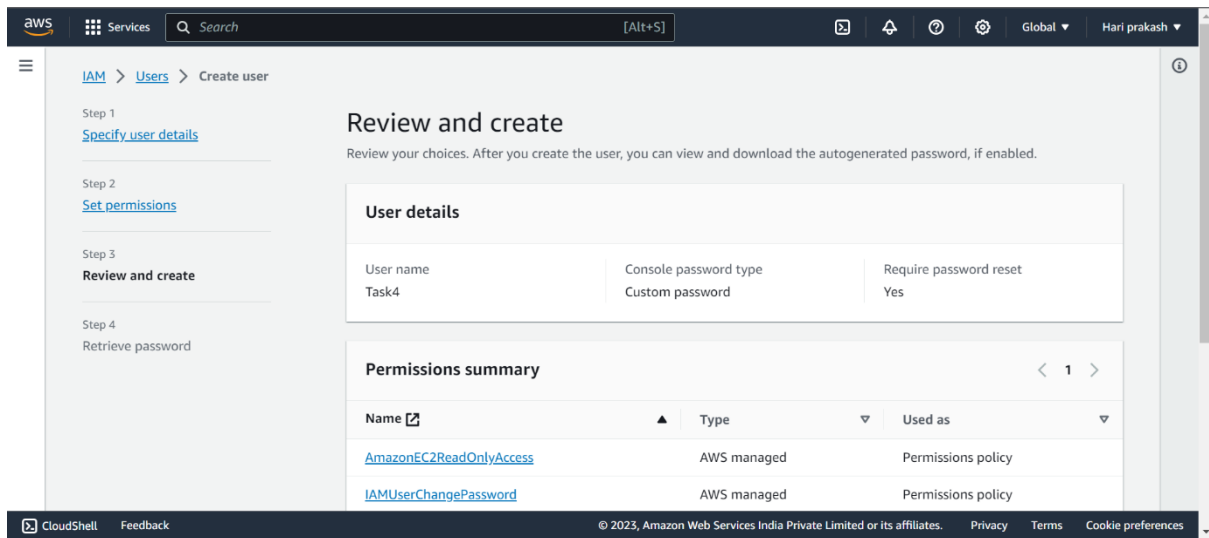

6. Here we custom our password

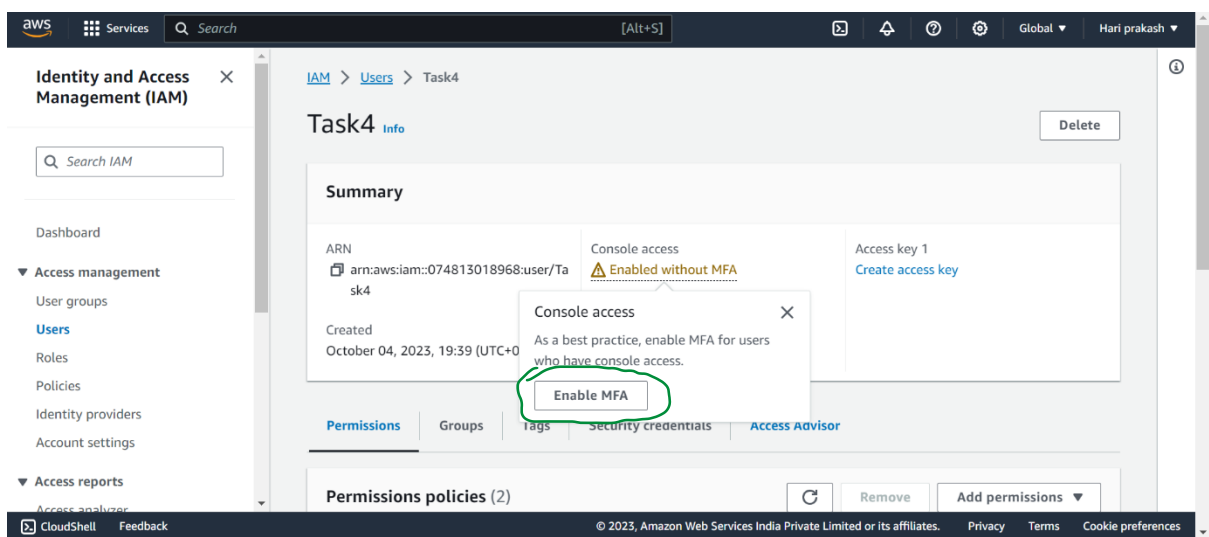

7. In this we attach the policies directly

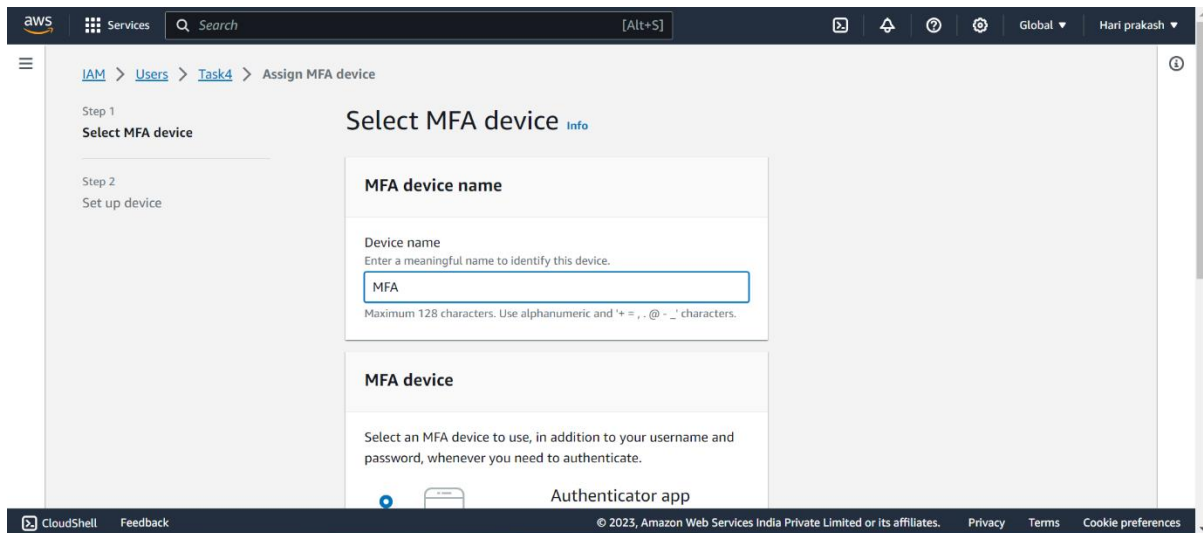

8. In this I select AmazonEC2ReadOnly policies and then click next

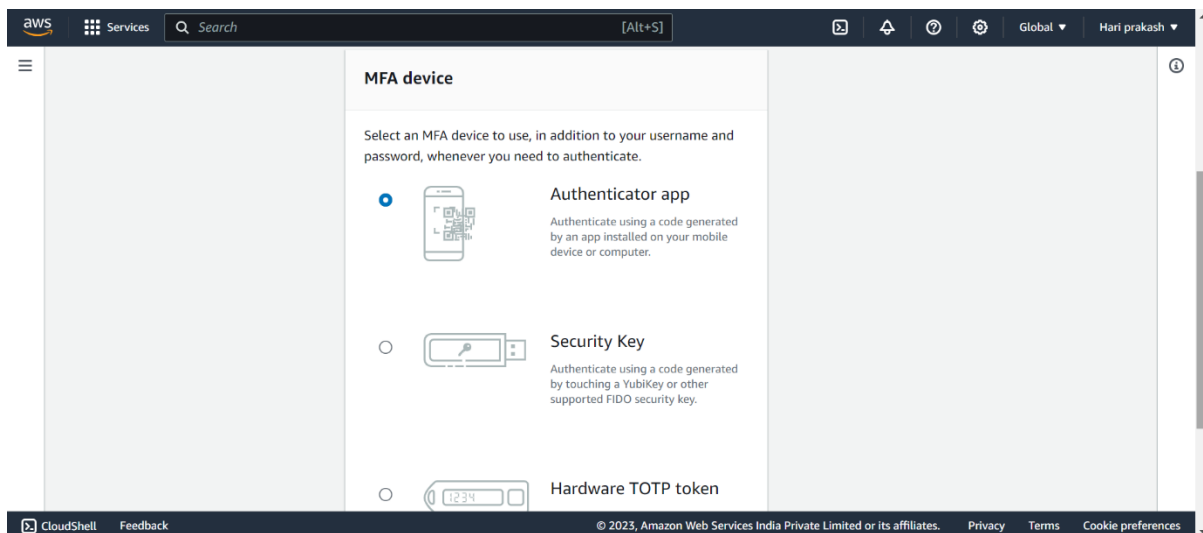

9. In the permission summary we get that the permission policies that we selected and the we create the user

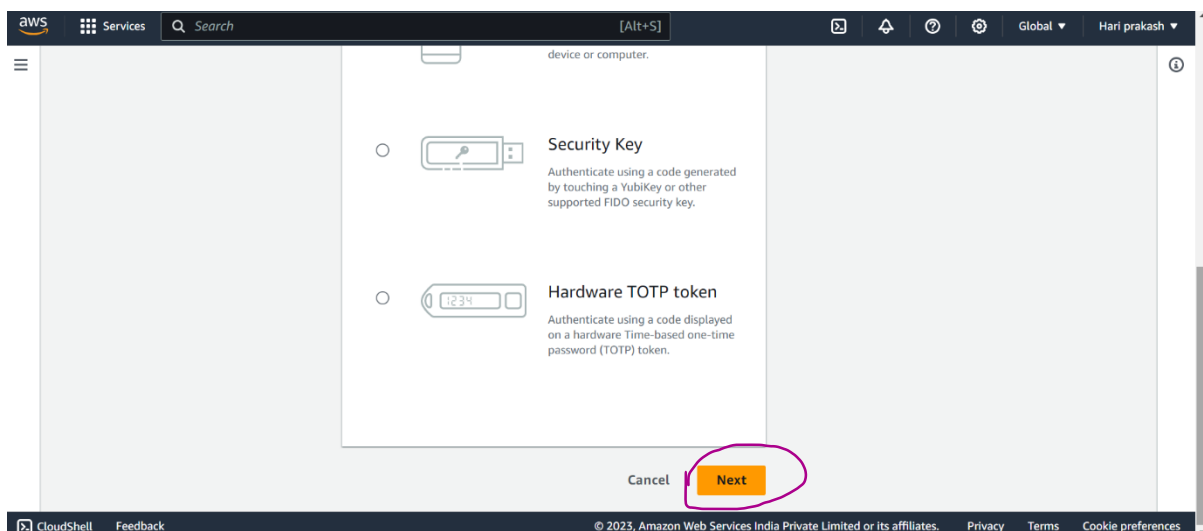

10. In that console access we enable the MFA

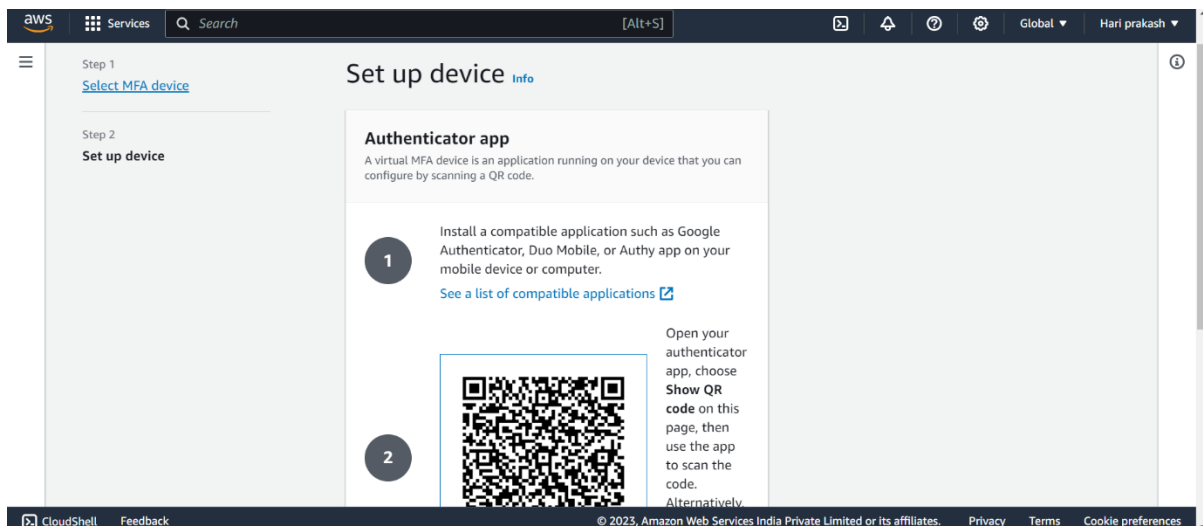

11. In the select MFA device we should enter the device name as MFA

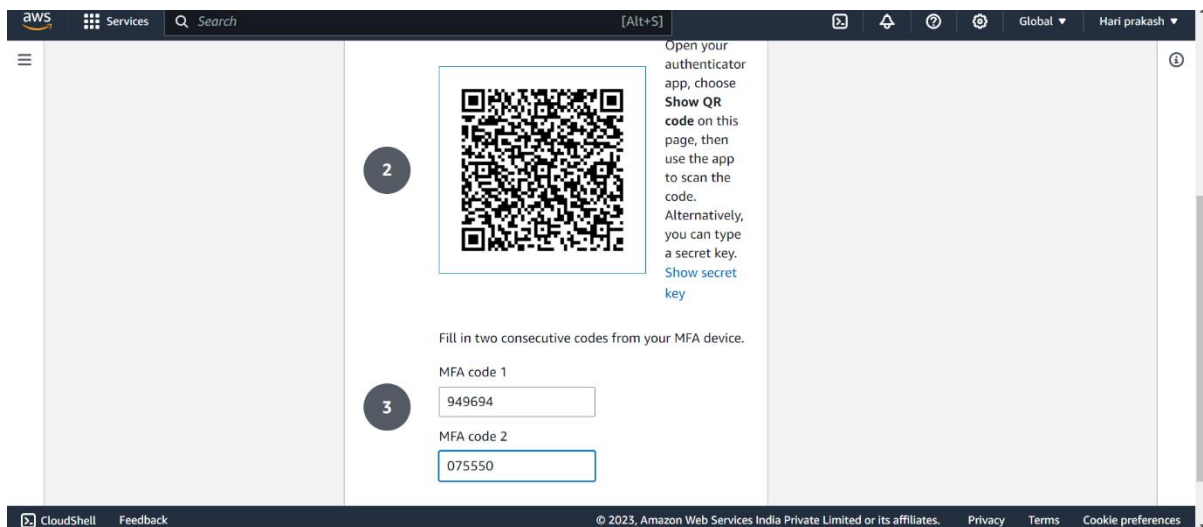

12. we should install the authenticator app for MFA

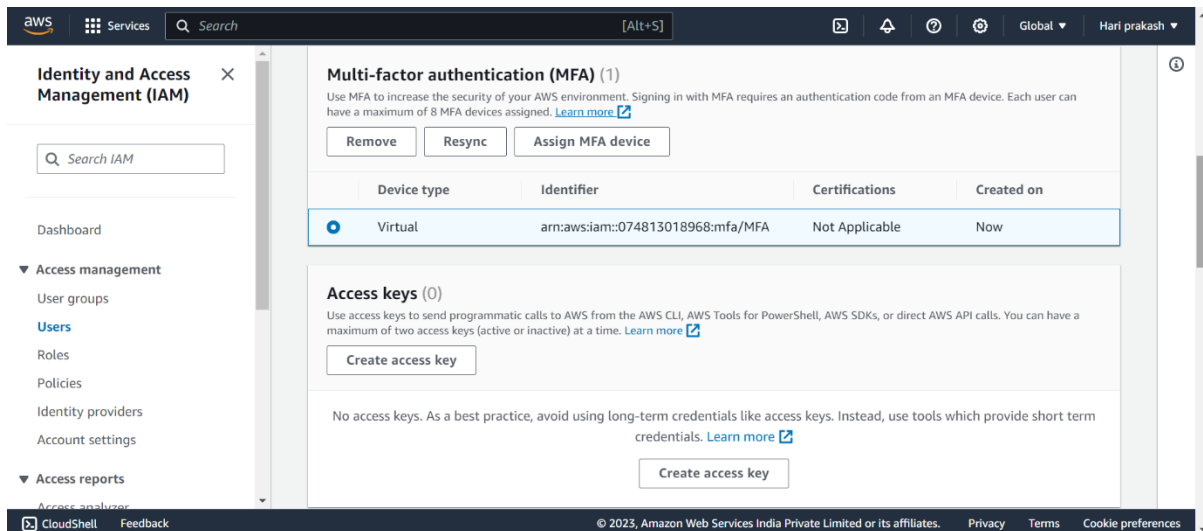

13. And then Click Next

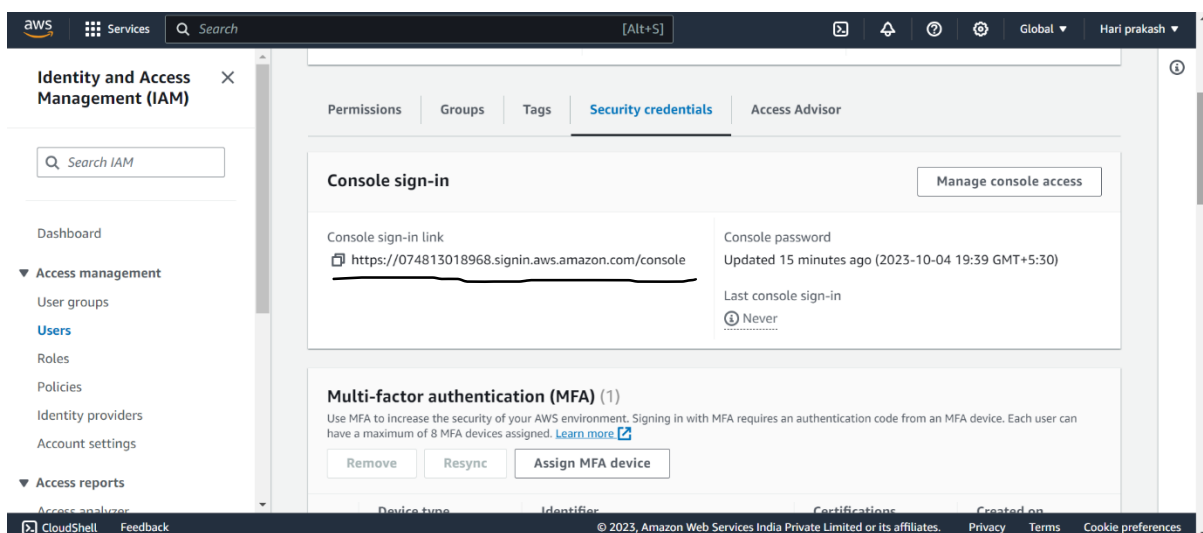

14. In the authenticator app in step 2 we scan the QR code in the authy application in the mobile

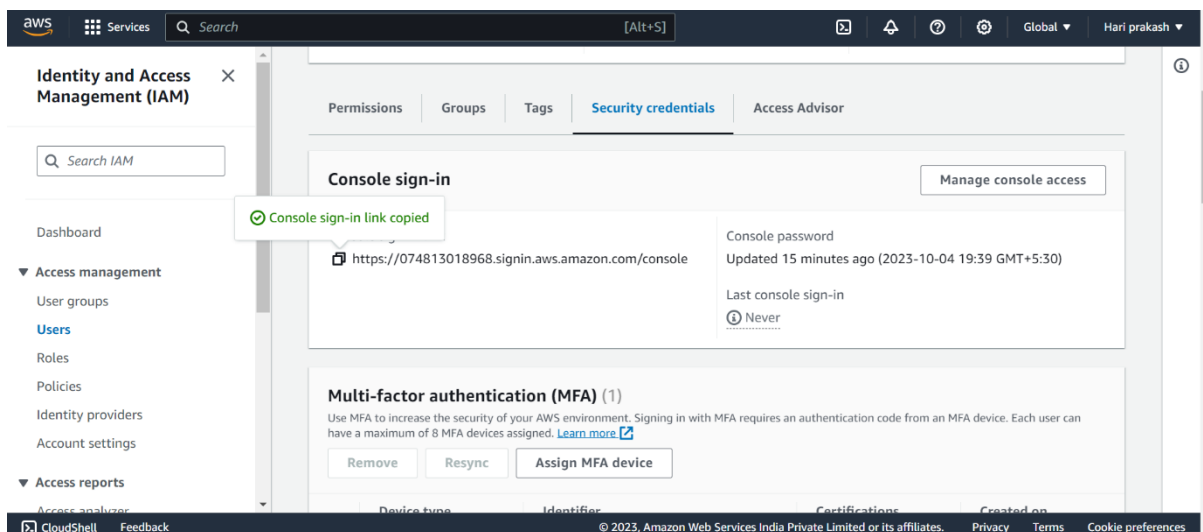

15. And after scanning the authy application generate MFA code 1 and then after 30 second it generate MFA code 2

16. After entering the MFA code it will be created and then select the device type

17. In that console sign-in they have a link to sign in as an IAM user

18. Copy the console sign-in link and then paste in the new tab

Sign in as IAM user

Account ID (12 digits) or account alias

074813018968

IAM user name
